

General Knowledge

- Q1** Washing soda is used in the manufacture of which of the following compounds?
 (A) Borax
 (B) Bleaching powder
 (C) Green vitriol
 (D) Blue vitriol
- Q2** Protection of life and liberty is included under which Article of the Constitution of India?
 (A) Article 21 (B) Article 23
 (C) Article 24 (D) Article 20
- Q3** On which date is World Wetlands Day observed in 2026?
 (A) February 2 (B) January 31
 (C) March 2 (D) April 22
- Q4** Which of the following statements is/are true?
 (i) CD-ROM is an optical disk that can only be read and not written on.
 (ii) Both, CD-R and CD-RW are optical disks.
 (A) Neither (i) nor (ii)
 (B) Only (ii)
 (C) Only (i)
 (D) Both (i) and (ii)
- Q5** Which of the following metals is stored in kerosene oil?
 (A) Copper (B) Sodium
 (C) Platinum (D) Gold
- Q6** In Microsoft Word, under character formatting_____ is used to superscript and subscript.
 (A) Font style (B) Underline
 (C) Effects (D) Size
- Q7** The term 'Back-stick' is used in which of the following games/sports?
 (A) Basketball (B) Badminton
 (C) Hockey (D) Volleyball
- Q8** Which of the following musical instruments were played by the musicians such as Shakoore Khan and Pandit Ram Narayan?
 (A) Sarangi (B) Shehnai
 (C) Guitar (D) Veena
- Q9** Buddha meditated for days on end under a peepal tree at_____, where he attained enlightenment.
 (A) Sarnath (B) Bodh Gaya
 (C) Kushinagar (D) Ujjain
- Q10** What is the chemical name of Plaster of Paris?
 (A) Calcium sulphate hemihydrate
 (B) Calcium acetate
 (C) Calcium carbonate
 (D) Calcium sulphate dihydrate
- Q11** Who among the following was the first chief guest to attend the Republic Day in 1950?
 (A) Sukarno
 (B) Josip Broz Tito
 (C) Kwame Nkrumah
 (D) Gamal Abdel Nasser
- Q12** Lucknow achieved a notable rank in September 2025 for resolving which type of cases among Uttar Pradesh districts?
 (A) Criminal cases
 (B) Civil suits
 (C) Revenue / land revenue cases
 (D) Family court cases
- Q13** The war that spread beyond Southern India and into Bengal, where British forces under Robert Clive recaptured Calcutta from Nawab Sirajud-Daulah, who had the support of the French, was:
 (A) The Battle of Buxar in 1764
 (B) The Battle of Plassey in 1757
 (C) The Battle of Wandiwash in 1760
 (D) The Battle of Adyar in 1746

Q14 Indira Point was formerly known as ____.

- (A) Pyramidal point
- (B) Pygmalion Point
- (C) Barsaat Point
- (D) Python Point

Q15 Hepatitis-B is transmitted through :

- (A) Sneezing
- (B) Female Anopheles
- (C) Coughing
- (D) Blood transfusion

Q16 Which of the following is an example of indirect tax?

- (A) Gift tax
- (B) Corporation tax for firms
- (C) Property tax
- (D) G.S.T.

Q17 On which date is the International Day for Preventing the Exploitation of the Environment in War and Armed Conflict observed each year?

- (A) November 5
- (B) November 7
- (C) November 6
- (D) November 8

Q18 What is the main objective of the Cashless Treatment of Road Accident Victims Scheme, 2025, notified by the Government of India?

- (A) To provide vehicle insurance subsidies to drivers
- (B) To offer ₹1.5 lakh as compensation for damaged vehicles
- (C) To ensure up to ₹1.5 lakh in cashless medical treatment for accident victims within the first seven days
- (D) To fund road safety awareness programs in schools

Q19 Hard copy is a term used to describe

- (A) Printed output
- (B) Writing on a hard board
- (C) Storing information on the hard disk
- (D) All of the above

Q20 The Comptroller and Auditor General of India is a ____.

- (A) single-member body
- (B) six-member body
- (C) two-member body
- (D) three-member body

Q21 Which National Park of UP lies in the Terai belt along rivers and swamps?

- (A) Chandraprabha National Park
- (B) Dudhwa National Park
- (C) Jim Corbett National Park
- (D) Valmiki National Park

Q22 What is India's rank in the 2025 World Press Freedom Index?

- (A) 151st
- (B) 145th
- (C) 159th
- (D) 148th

Q23 Start Up India Scheme which aims at developing an ecosystem that promotes and nurtures entrepreneurship across the country was launched in ____.

- (A) 2016
- (B) 2020
- (C) 2012
- (D) 2018

Q24 Which institution secured AMBA accreditation and received 4 Palms of Excellence in the Eduniversal Rankings 2025?

- (A) IIM Ahmedabad
- (B) IIM Ranchi
- (C) IIM Bangalore
- (D) IIM Kozhikode

Q25 Which of the following is the core of an operating system?

- (A) Ventura
- (B) Xenix
- (C) Device Driver
- (D) Kernel

Q26 Which of the following keys is normally not used as a modifier key?

- (A) Alt
- (B) Ctrl
- (C) Tab
- (D) Shift

Q27 Which of the following factors of soil formation determines the accumulation of the soil?

- (A) Fauna
- (B) Flora
- (C) Relief
- (D) Parent rock

Q28 Where was the Grand International Exposition of Sacred Piprahwa Relics related to Bhagwan

- Buddha inaugurated by the Prime Minister?
 (A) Varanasi (B) Lucknow
 (C) New Delhi (D) Bodh Gaya
- Q29** Who has been appointed as the Chair of the International Olympic Committee (IOC) Coordination Commission for the 2032 Olympic Games in Brisbane, Australia?
 (A) Thomas Bach
 (B) Sebastian Coe
 (C) Mikee Cojuangco-Jaworski
 (D) Kirsty Coventry
- Q30** The resistivity of a material of length 5 m is 1.6×10^{-8} ohm-m. If the length of the material is increased by 10 m, then the value of resistivity is _____.
 (A) 12.4×10^{-8}
 (B) 0.8×10^{-8}
 (C) 3.2×10^{-8}
 (D) 1.6×10^{-8}
- Q31** Which generation of the computer developed using integrated circuits?
 (A) Second generation
 (B) Fifth generation
 (C) Third generation
 (D) All of the above
- Q32** Which country signed its first defence Memorandum of Understanding with India through the JCBL Group in April 2025?
 (A) Hungary (B) Slovakia
 (C) Poland (D) Czech Republic
- Q33** Limestone, chalk and marble are different forms of _____.
 (A) Calcium phosphate
 (B) Calcium hydroxide
 (C) Calcium oxide
 (D) Calcium carbonate
- Q34** A lemon kept in water in a glass tumbler appears to be bigger than its actual size when viewed from the sides. What is the reason behind this phenomenon?
 (A) Diffraction of light
 (B) Internal reflection of light
 (C) Refraction of light
 (D) Reflection of light
- Q35** Which country is hosting the Global Media Dialogue (GMD) during the WAVES 2025 event to promote international cooperation in the media sector?
 (A) Japan (B) Russia
 (C) India (D) United Kingdom
- Q36** Which of the following shortcut key is used to make the contents of a cell italic in MS Excel 365?
 (A) Ctrl + 4 (B) Ctrl + 3
 (C) Ctrl + 6 (D) Ctrl + 2
- Q37** Who presented the Objective Resolution that was later adapted as the Preamble of the Constitution of India?
 (A) Rajendra Prasad
 (B) JB Kripalani
 (C) Jawaharlal Nehru
 (D) BR Ambedkar
- Q38** What will be the acceleration produced when a force of 21 N is applied on an object of mass 3 kg?
 (A) 0.7 ms^{-2} (B) 7 ms^{-2}
 (C) 0.007 ms^{-2} (D) 70 ms^{-2}
- Q39** Which Central American country recently inaugurated its embassy in New Delhi to strengthen diplomatic and trade relations with India?
 (A) Guatemala (B) Honduras
 (C) El Salvador (D) Nicaragua
- Q40** What type of plastic is commonly used in water bottles?
 (A) PVC (B) PET
 (C) HDPE (D) LDPE
- Q41** A convex lens with power 10 D will form 3 times real magnified image of an object kept at _____ distance from lens.

- (A) 12.42 cm (B) 13.33 cm
(C) 15 cm (D) 17.88 cm
- Q42** The total pressure of a mixture of ideal gases is the sum of partial pressures. This is _____ law of partial pressures.
(A) Dalton's
(B) Boyles
(C) Charles
(D) Avogadro's
- Q43** If the momentum of a body is doubled, the kinetic energy is _____.
(A) Becomes 1/4 times
(B) Unchanged
(C) Doubled
(D) Becomes 4 times
- Q44** _____ is concerned with cell division.
(A) Cytokinin
(B) Gibberellin
(C) Maleic hydrazide
(D) Auxins
- Q45** Which of the following is not a characteristic of monocots?
(A) Parallel leaf veins
(B) Fibrous root system
(C) Seeds with two cotyledons
(D) Floral parts in multiples of three
- Q46** In the symbol of the electric cell, the thicker, shorter line represents the:
(A) Ring terminal
(B) Positive terminal
(C) Negative terminal
(D) Neutral terminal
- Q47** What is the colour of the Kidney?
(A) Green (B) Reddish Brown
(C) Black (D) White
- Q48** Where does photosynthesis primarily occur in plants?
(A) Roots (B) Stems
(C) Leaves (D) Flowers
- Q49** Which of the following statements is not true regarding electromagnets?
(A) They do not lose magnetism when electric current is switched off.
(B) They can be made very strong to lift heavy objects.
(C) They are used to separate magnetic material from junk.
(D) They attract pieces of iron.
- Q50** Which of the following gas is the other name for 'Marsh Gas'?
(A) Butane (B) Propane
(C) Ethane (D) Methane

Hints & Solutions

Q1 Text Solution:

- Sodium carbonate (washing soda) is used in glass, soap, and paper manufacturing.
- It is used in the production of sodium-based chemicals like borax.
- One can use sodium carbonate as a household cleaning solution.
- It is used to eliminate the permanent hardness of water.
- Sodium carbonate (Na_2CO_3) is the chemical name for the washing soda.

Hence, the correct answer is "Borax".

Q2 Text Solution:

- The preservation of life and individual liberty are topics addressed in Article 21 of the Indian Constitution.
- It stipulates that no person shall be deprived of his life or of his personal liberty unless in accordance with the procedure that has been established by law.

Hence, the correct answer is 'Article 21'.

Q3 Text Solution:

- World Wetlands Day is observed every year on 2 February, and the same date applies in 2026 as well.
- The day marks the adoption of the Ramsar Convention on 2 February 1971, which is an international treaty dedicated to the conservation and wise use of wetlands.
- In 2026, the theme for World Wetlands Day is "Wetlands and traditional knowledge: Celebrating cultural heritage."
- The observance highlights the ecological, cultural, and economic importance of wetlands across the world.
- Wetlands play a crucial role in biodiversity conservation, climate regulation, flood control, and water purification.

- The Ramsar Convention currently has 172 contracting parties, showing global commitment toward wetland protection.
- India is a significant contributor, with 98 Ramsar Sites, underlining the country's rich wetland diversity and conservation efforts.
- The day also emphasizes the role of wetlands in supporting traditional livelihoods and indigenous knowledge systems.

Hence, the correct answer is "February 2."

Q4 Text Solution:

- CD-ROM is an optical disk that can only be read and not written on.
- A CD-ROM (Compact Disc Read-Only Memory) is designed for read-only access and cannot be written on or modified.
- Both CD-R (Compact Disc-Recordable) and CD-RW (Compact Disc-Rewritable) are types of optical disks.
- CD-R can be written once and read many times, while CD-RW can be written and rewritten multiple times.

Hence, the correct answer is "Both (i) and (ii)".

Q5 Text Solution:

- Sodium metal is stored in kerosene oil.
- It is stored in kerosene because sodium reacts vigorously with oxygen and moisture due to its high reactivity.
- Sodium is a chemical element of the periodic table's alkali metal group (Group 1).
- It is a very soft silvery-white metal.
- It is denoted by the symbol "Na".

Hence, the correct answer is "Sodium".

Q6 Text Solution:

- In Microsoft Word, under-character formatting Effects is used to superscript and subscript the .

- Steps to apply superscript or subscript formatting to text: -
- First, we have to select the character that we want to format as a superscript or subscript.
- Then on the Home tab, in the Font group, we have to pick the Font Dialog Box Launcher.
- Then on the Font tab, under Effects, we have to select the Superscript or Subscript check box.

Hence, the correct answer is "Effects".

Q7 Text Solution:

- In the sport of hockey, the "back-stick" is a common word.
- It is a violation of the rules to attempt a shot at the goal when the puck hits the rounded part of the hockey stick.
- In hockey, it is against the rules for players to utilize either side of the stick.
- Obstruction, Third-party obstruction, Advancing, Hockey stick interference, undercutting, and sticks are a number of fouls punished in a game of hockey.

Hence, the correct answer is "Hockey".

Q8 Text Solution:

- Pandit Ram Narayan is an Indian classical musician renowned for his virtuosity on the sarangi, a traditional bowed string instrument. He was born in 1927 in Udaipur, Rajasthan, India.
- He elevated the sarangi to a position of prominence, making it more accessible to audiences worldwide and earning accolades for his innovative approach to playing and performing.
- One of the best sarangi musicians of the 20th century was Ustad Shakoore Khan (1905-1975).
- Due to his status as Ustad Abdul Waheed Khan's nephew and disciple, he was firmly associated with the Kirana Gharana.
- He was the first sarangiya to be given the Padmashri award by the Indian government.

Mashkoor Ali and Mubarak Ali, his two sons, are well-known singers.

Hence, the correct answer is "Sarangi".

Q9 Text Solution:

- Buddha, also known as Siddhartha Gautama, is believed to have travelled extensively throughout his life, visiting various places in India and Nepal.
- He was born in Lumbini, Nepal, and spent his early years in Kapilavastu, Nepal.
- Later, he travelled to places such as Bodh Gaya, where he attained enlightenment under a peepal tree, and Sarnath, where he gave his first sermon.
- He also visited Kushinagar, where he is said to have passed away.
- These places hold great significance for Buddhists and are popular pilgrimage destinations.

Hence, the correct answer is "Bodh Gaya".

Q10 Text Solution:

- Plaster of Paris is a common mineral found in rocks.
- Gypsum, which is chemically calcium sulphate dihydrate, is heated to 373 K to prepare it.
- At this temperature, gypsum loses water molecules and forms Plaster of Paris (calcium sulphate hemihydrates).
- Its chemical formula is $\text{CaSO}_4 \cdot \frac{1}{2}\text{H}_2\text{O}$.

Hence, the correct answer is "Calcium sulphate hemihydrate".

Q11 Text Solution:

- Republic Day is celebrated every year on January 26th in India to commemorate the adoption of the Constitution of India on January 26th, 1950.
- The first Republic Day parade was held at Rajpath in New Delhi on January 26th, 1950.
- The guest of honor for the first Republic Day parade was Dr. Sukarno, the first President of

Indonesia. His attendance at the parade symbolized the close ties between India and Indonesia and their shared commitment to democracy.

Hence, the correct answer is “Sukarno”.

Q12 Text Solution:

- In September 2025, Lucknow district achieved the top rank in Uttar Pradesh for resolving revenue (land revenue) cases.
- The district successfully disposed of 21,296 such cases, the highest number among all districts in the state.
- This achievement reflects improved judicial efficiency and effective case management by the district administration.
- Resolving land revenue cases is critical for reducing land disputes, ensuring clarity of property rights, and boosting agricultural and developmental projects.
- The administration in Lucknow adopted measures such as digitization of records, better coordination between departments, and fast-track hearings to speed up resolution.
- This accomplishment demonstrates the importance of streamlined processes in improving public trust in the judicial system.
- Such achievements contribute to the broader goal of making justice more accessible, timely, and effective for citizens.

Hence, the correct answer is “Revenue / land revenue cases.”

Q13 Text Solution:

- The Battle of Plassey was a significant battle that took place on June 23, 1757, in the region of Bengal, India. It marked a turning point in British colonial rule in India and had far-reaching consequences.
- During that time, the Nawab of Bengal, Siraj-ud-Daulah, was in control of the Bengal region.

- The British East India Company, under the leadership of Robert Clive, sought to expand their influence and control over the region. The battle occurred as a result of the escalating tensions between the British and the Nawab.

Hence, the correct answer is "The Battle of Plassey in 1757".

Q14 Text Solution:

- Indira Point, previously called Pygmalion Point and also known as Parsons Point, is located on Great Nicobar Island.
- It stands as the southernmost tip of India and was named in honor of the former Prime Minister of India, Indira Gandhi.

Hence the correct answer is Pygmalion Point.

Q15 Text Solution:

- Hepatitis B is a viral infection that affects the liver.
- It is transmitted through contact with infected bodily fluids.
- Hepatitis B is transmitted through blood transfusion (infected blood or blood products), unprotected sex (through bodily fluids), sharing needles (contaminated syringes, razors, or tattoo equipment), and from infected mother to child (during childbirth).

Hence, the correct answer is "Blood transfusion".

Q16 Text Solution:

- G.S.T. stands for Goods and Services Tax.
- It is an indirect tax.
- It was implemented on 1 July 2017.
- It is a single tax that is levied on the supply of goods and services from the manufacturer to the consumer.
- Gift tax, corporation tax from firms and property tax are direct taxes.

Hence, the correct answer is "G.S.T."

Q17 Text Solution:

- The **International Day for Preventing the Exploitation of the Environment in War and Armed Conflict** is observed every year on **November 6**.
- It was established by the **United Nations General Assembly in 2001** through **Resolution A/RES/56/4**.
- The day raises awareness about the **environmental damage caused by wars and armed conflicts**.
- It stresses that the **environment is often a silent victim of war** and must be safeguarded even during conflict.
- The observance promotes **peace, sustainability, and environmental protection** in global policy frameworks.
- It aligns with the **UN's 2030 Agenda for Sustainable Development**, supporting goals like **Climate Action (SDG 13)** and **Peace, Justice, and Strong Institutions (SDG 16)**.

Hence, the correct answer is "**November 6**."

Q18 Text Solution:

- The Government of India notified the Cashless Treatment of Road Accident Victims Scheme, 2025, effective from May 5, 2025.
- The scheme aims to provide immediate cashless medical care to road accident victims.
- Victims are eligible for up to ₹1.5 lakh in medical expenses covered during the first seven days following an accident.
- This initiative is designed to reduce delays in emergency treatment and improve survival and recovery outcomes.

Hence, the correct answer is "**To ensure up to ₹1.5 lakh in cashless medical treatment for accident victims within the first seven days**".

Q19 Text Solution:

- The term "hard copy" is used to describe printed output. It refers to a physical, tangible

representation of information printed or reproduced on paper or other physical media.

- Hard copies are typically produced from digital documents or electronic data and provide a permanent, physical record that can be easily read and shared.
- Examples of hard copies include printed documents, reports, photographs, and any other printed materials that contain textual or graphical information. The term "hard copy" is often used in contrast to "soft copy," which refers to digital or electronic representations of information displayed on screens or stored in electronic formats.

Hence, the correct answer is '**Printed output**' .

Q20 Text Solution:

- The Comptroller and Auditor General of India is the nation's principal auditing authority, as per Article 148 of the Indian Constitution.
- They possess the power to scrutinize each rupee that is received and disbursed by the Indian government and the state governments.
- In addition, the CAG is a government-owned corporation's statutory auditor.
- It conducts further audits of companies that are owned by the government or that are subsidiaries of companies that are already owned by the government and in which the government has at least a 51% equity holding.

Hence, the correct answer is "**single-member body**".

Q21 Text Solution:

- Dudhwa lies in the Terai belt, characterised by marshes and rivers.
- Seasonal flooding enriches soil fertility.
- The habitat supports rich biodiversity.

Hence, the correct answer is "**Dudhwa National Park**".

Q22 Text Solution:

- In the 2025 World Press Freedom Index, India ranked 151st globally.
- This is an improvement from its 159th position in the 2024 index.
- Despite the improvement, the ranking highlights continued concerns regarding media freedom in the country.
- Factors contributing to the low rank include economic challenges for media houses and increasing restrictions on independent journalism.
- The index also noted that the Middle East and North Africa remain the most dangerous regions for journalists.

Hence, the correct answer is "151st."

Q23 Text Solution:

- The Start-Up India Scheme was launched by the Indian Government on January 16, 2016.
- The scheme aims to create a conducive environment for the growth of startups in India.
- It focuses on fostering entrepreneurship and promoting innovation by providing access to funding, mentorship, and networking opportunities.
- The scheme provides various benefits to startups, including tax exemptions, relaxed compliance norms, and faster patent processing.
- The initiative also aims to promote skill development, facilitate ease of doing business, and encourage startup companies to drive economic growth in India.

Hence, the correct answer is "2016".

Q24 Text Solution:

- IIM Ranchi has achieved two significant milestones: gaining international AMBA accreditation and earning 4 Palmes of Excellence in the Eduniversal Rankings 2025.
- The AMBA accreditation places IIM Ranchi among the top global business schools that

meet rigorous standards for management education.

- The 4 Palmes of Excellence designation from Eduniversal further acknowledges its standing in the global rankings.
- AMBA Accreditation: This international accreditation from the Association of MBAs signifies that IIM Ranchi meets the highest global standards for management education, according to the institute's press release.
- Eduniversal Rankings 2025: In the Eduniversal rankings, IIM Ranchi was awarded 4 Palmes of Excellence, a recognition of its high performance and standing among the world's business schools.
- These achievements together reaffirm IIM Ranchi's position as a leading institution in management education, both nationally and internationally.

Hence, the correct answer is "IIM Ranchi".

Q25 Text Solution:

- The kernel is the essential centre of a computer operating system (OS).
- It helps with process and memory management, file systems, device control, and networking.
- Ventura Publisher was the first popular desktop publishing package for IBM PC-compatible computers running the GEM extension to the DOS operating system.
- Xenix is a discontinued version of the Unix operating system for various microcomputer platforms, licensed by Microsoft from AT&T Corporation in the late 1970s.

Hence, the correct answer is "Kernel".

Q26 Text Solution:

- Among the listed keys, Tab is typically not used as a modifier key. It functions primarily to move the cursor to the next tab stop or field in a document or form.

- In contrast, keys like Alt, Ctrl, and Shift are commonly used as modifier keys to modify the function of other keys when pressed in combination. They are essential for executing shortcuts and other commands in various software applications.

Hence, the correct answer is 'tab.'

Q27 Text Solution:

- Soil is the mixture of rock debris and organic materials which develop on the earth's surface.
- The major factors affecting the formation of soil are relief, parent material, climate, vegetation and other life-forms and time.
- Besides these, human activities also influence it to a large extent.
- Components of the soil are mineral particles, humus, water and air. The actual amount of each of these depend upon the type of soil. Some soils are deficient in one or more of these, while there are some others that have varied combinations.

Hence, the correct answer is "Relief".

Q28 Text Solution:

- The Grand International Exposition of Sacred Piprahwa Relics was inaugurated in New Delhi.
- The exhibition showcases sacred relics associated with Gautama Buddha, highlighting his teachings of peace, compassion, and harmony.
- The Piprahwa relics are archaeologically significant, as Piprahwa is believed to be a burial site of a portion of Buddha's ashes.
- Hosting the exposition in the national capital provides global visibility and cultural prominence to the event.
- The exhibition helps promote India's rich Buddhist heritage and its role in preserving ancient relics.
- It also spreads awareness about the historical and philosophical relevance of Buddhism

worldwide.

Hence, the correct answer is "New Delhi."

Q29 Text Solution:

- Mikee Cojuangco-Jaworski has been appointed as the Chair of the IOC Coordination Commission for the 2032 Olympic Games.
- The 2032 Olympics will be hosted in Brisbane, Australia.
- As Chair, she will oversee the planning and progress of the event, ensuring it aligns with the Olympic Movement's values and timelines.
- This appointment highlights her leadership role and the trust placed in her by the International Olympic Committee (IOC).

Hence, the correct answer is "Mikee Cojuangco-Jaworski".

Q30 Text Solution:

- Given: Resistivity is 1.6×10^{-8} of material of length 5 m.
- To find: Resistivity at length 10 m.
- As we know $R = \rho LA$, we have resistivity and length related to each other.
- But as the length doubles the area reduces, and thus no change in the resistivity occurs and thus resistivity remains constant if we increase the length many times.
- So, the resistivity at a 10m length increase is 1.6×10^{-8} ohm-m.

Hence, the correct answer is " 1.6×10^{-8} ".

Q31 Text Solution:

- **Second generation** - These computers were developed in the 1950s and 1960s, and they used transistors.
- **Fifth generation** - Fifth generation computers refers to the current generation of computers that use artificial intelligence and machine learning technologies.
- **Third generation** - The third generation of computers used integrated circuits led to

smaller, more powerful, and more reliable computers that were also more energy-efficient.

Hence, the correct answer is "Third generation".

Q32 Text Solution:

- Slovakia signed its first-ever defence Memorandum of Understanding (MoU) with India in April 2025.
- The agreement was formalized during President Droupadi Murmu's visit to Slovakia.
- The MoU was signed through India's JCBL Group, specifically its defence wing, ADSL (Associated Defence Systems Ltd.).
- It focuses on the co-development of next-generation combat vehicle technologies.
- Slovakia will share advanced defence technologies, while manufacturing will be carried out in India, boosting indigenous production.
- This collaboration aligns with India's "Make-in-India" and Atmanirbhar Bharat initiatives and strengthens strategic defence ties.

Hence, the correct answer is "Slovakia."

Q33 Text Solution:

- The minerals limestone, marble, and chalk are all made up of the same chemical composition known as calcium carbonate.
- Both limestone and chalk are types of sedimentary rock known as limestone.
- Dead sea animals' skeletal remains sink to the bottom. The bottom layer turns into chalk over millions of years due to layer accumulation and pressure from the upper layer.
- The chalk layer is raised to the surface of the Earth by earthquake-induced earth movement.
- The layers may sink even more as a result of the earth's movement. As a result, heat and high pressure transform chalk into much harder limestone.

- The limestone deposit might remain underground for a longer period of time before turning into marble as a result of increased pressure and temperature.

Hence, the correct answer is "Calcium carbonate".

Q34 Text Solution:

- Refraction refers to the bending of a light ray as it passes from one medium to another.
- Light refraction occurs when moving from one medium to another due to the difference in light speed between the two media.
- The amount of refraction increases with the difference in light speeds between the two media.
- An optically rarer medium is one with a higher speed of light, whereas an optically denser medium has a lower speed of light.

Hence, the correct answer is "Refraction of light".

Q35 Text Solution:

- India is hosting the Global Media Dialogue (GMD) for the first time as part of the WAVES 2025 event in Mumbai.
- The event is organized by the Ministry of Information and Broadcasting, with support from the Ministry of External Affairs.
- Over 60 nations, including major players like the UK, Japan, and Russia, are participating in the dialogue.
- The initiative aims to foster international cooperation in media through policy alignment, content innovation, talent exchange, and the launch of the 'WAVES Declaration'.
- This marks a significant step in positioning India as a key global hub for media and entertainment.

Hence, the correct answer is "India."

Q36 Text Solution:

In MS Excel 365, the following shortcut keys can be used for formatting:

- Ctrl + I or Ctrl + 3 for Italicizing text or removing italic formatting.
- Ctrl + B or Ctrl + 2 for Bold text or removing bold formatting.
- Ctrl + U or Ctrl + 4 for Underlining text or removing underline.
- Ctrl + 5 for applying or removing strikethrough formatting.

Hence, the correct answer is " Ctrl + 3".

Q37 Text Solution:

- Jawaharlal Nehru proposed the historic 'Objectives Resolution' in the Assembly on December 13, 1946.
- It outlined the principles and tenets of the constitutional framework.
- The Assembly on January 22, 1947, unanimously adopted this resolution.
- It affected the final form of the constitution and every step that followed.
- Its altered form serves as the Preamble to the current Constitution.
- The first Minister of Law and Justice of independent India was Bhimrao Ramji Ambedkar.
- He was credited as being the main designer of the Indian Constitution. In 1990, he received the Bharat Ratna.
- He was born in Mhow, Indore, on April 14, 1891.

Hence, the correct answer is "Jawaharlal Nehru".

Q38 Text Solution:

- Force is the interaction that, upon application to a body, modifies or attempts to modify the state of motion or rest.
- It is denoted by F and the SI unit is Newton (N).
- We Know that, Force (F) = Mass (m) × acceleration (a) ⇒ Acceleration = Force/Mass ⇒ $21/3 \text{ N} \cdot \text{kg}^{-1} \Rightarrow 7 \text{ ms}^{-2}$.

Hence, the correct answer is "7 ms⁻²".

Q39 Text Solution:

- On May 15, 2025, Honduras officially inaugurated its embassy in New Delhi, marking a significant milestone in India-Honduras relations.
- The inauguration was jointly conducted by Honduran Foreign Minister Eduardo Enrique Reina García and Indian External Affairs Minister S. Jaishankar, reflecting a commitment to deepen bilateral ties.
- Establishing the embassy aims to enhance cooperation in areas such as trade, investment, health, digital technology, energy, and disaster response.
- Honduras views India as a strategic gateway to Asia, while India sees Honduras as a bridge to Central America, facilitating mutual economic and diplomatic interests.
- Indian companies like Bajaj, Hero, and TVS have a notable presence in Honduras, indicating strong commercial ties between the two nations.
- The embassy's establishment is expected to further bolster development cooperation, technology exchange, and climate resilience initiatives.

Hence, the correct answer is "Honduras."

Q40 Text Solution:

- PET (Polyethylene Terephthalate) is commonly used in water bottles due to its lightweight and durability.
- It is known for its excellent ability to hold carbonated beverages without leaching chemicals.
- PET is also easily recyclable, making it an environmentally friendly choice for packaging.
- Water bottles made from PET are transparent, allowing consumers to see the contents clearly.

Hence, the correct answer is "PET."

Q41 Text Solution:

Power of Lens = 10 D

Focal length = $1/10D = 10 \text{ cm}$

Focal length of convex lens is positive

Magnification = v/u

Given image is real, and 3 times magnified

$M = -3$

$v/u = -3$

$v = -3u$

Now applying the lens formula

$$\frac{1}{f} = \frac{1}{v} - \frac{1}{u}$$

$$\frac{1}{10} = \frac{1}{-3u} - \frac{1}{u}$$

$$\frac{1}{10} = -\frac{1+3}{3u} = \frac{-4}{3u}$$

$$u = -40/3 = 13.33 \text{ cm}$$

Hence, the correct answer is 13.33 cm.

Q42 Text Solution:

- The law of partial pressures is known as Dalton's law of partial pressures, named after the British chemist John Dalton.
- According to the law of partial pressures, when ideal gases are mixed together at constant volume and temperature, the total pressure exerted is equivalent to the sum of the partial pressures of each gas present in the mixture.
- This law is based on the idea that each gas in a mixture behaves independently and exerts its own pressure, regardless of the presence of other gases.
- Dalton's law of partial pressures is widely used in various fields, including chemistry, physics, and engineering, to describe the behavior of gases in different situations.

Hence, the correct answer is "Dalton's".

Q43 Text Solution:

- When the momentum of a body is doubled, its kinetic energy increases by a factor of 4.
- This relationship is rooted in the kinetic energy formula, $KE = p^2 / (2m)$, where p represents momentum, and m is mass.

- Doubling momentum means p is now $2p$, and when squared in the formula, it results in 4 times the initial kinetic energy.
- This demonstrates the strong connection between momentum and kinetic energy, emphasizing how changes in momentum significantly impact the kinetic energy of a moving object.

Hence, the correct answer is "Becomes 4 times".

Q44 Text Solution:

- Cytokinin is a plant hormone involved in cell division regulation.
- It promotes cell division in plant tissues, particularly in roots and shoots.
- Cytokinin also plays a role in the development of chloroplasts and delays ageing in plants.
- It regulates various physiological processes like shoot initiation and growth.
- Cytokinin interacts with other hormones like auxins to maintain proper plant growth and development.

Hence, the correct answer is "Cytokinin."

Q45 Text Solution:

- Monocots typically have parallel leaf veins, a distinguishing feature that sets them apart from dicots.
- They also commonly possess a fibrous root system, which is characterized by thin, branching roots that spread out near the soil surface.
- Floral parts in monocots are usually arranged in multiples of three, such as three petals or six stamens.
- However, monocots differ from dicots in the number of cotyledons present in their seeds. Monocots have seeds with only one cotyledon,
- whereas dicots have seeds with two cotyledons.

Hence, the correct answer is "Seeds with two cotyledons."

Q46 Text Solution:

- In the symbol of the electric cell, the thicker, shorter line represents the **Negative terminal**.
- The positive terminal of the cell is represented by the thin, longer line in the symbol of an electric cell.
- There are different types of electric symbols which are used to represent the different electric devices like cell, battery, voltmeter, resistor, bulb, etc.

Hence the correct answer is "Negative terminal".

Q47 Text Solution:

- Kidneys are **reddish-brown**, bean-shaped structures situated between the levels of the last thoracic and third lumbar vertebra close to the dorsal inner wall of the abdominal cavity.
- Each kidney of an adult human measures 10-12 cm in length, and 5-7 cm in width.

Hence, the correct answer is 'Reddish Brown.'

Q48 Text Solution:

- Photosynthesis primarily takes place in the chloroplasts of plant cells.
- Chloroplasts are most abundant in the cells of the leaves.
- Leaves are designed with structures like stomata and chlorophyll to facilitate photosynthesis.
- Stomata allow for gas exchange, crucial for the process of photosynthesis.
- Chlorophyll, found in the chloroplasts, captures light energy used in photosynthesis.

- The green color of leaves is due to chlorophyll, highlighting their role in photosynthesis.
- Overall, leaves are the primary location for photosynthesis in plants.

Hence, the correct answer is "Leaves."

Q49 Text Solution:

- Electromagnets lose their magnetism when the electric current is switched off.
- Unlike permanent magnets, which retain their magnetism without an external power source, electromagnets require an electric current to create a magnetic field.
- When the current is turned off, the magnetic field collapses, and the electromagnet loses its magnetism.

Hence, the correct answer is "They do not lose magnetism when electric current is switched off".

Q50 Text Solution:

- Methane is commonly known as marsh gas due to its presence near the surface of marshy areas.
- It is the lightest hydrocarbon, consisting of one carbon and four hydrogen atoms.
- Methane is a major component of biogas or Gobar gas, comprising 60-70% of its composition.
- As a greenhouse gas, methane contributes to global warming along with other gases like carbon dioxide and nitrous oxide.
- It is produced during the anaerobic decomposition of organic matter in soil, especially in wetland environments.

Hence, the correct answer is "Methane."
